CUSTOM SOFTWARE DEVELOPMENT COMPANY

Watermelons.dev

Business Challenge.

Finding the Right Target Audience was probably the main challenge. The challenge lies in determining which industries, sectors, or specific businesses are most likely to benefit from the service. And establishing trust with potential clients can be challenging, particularly for new or lesser-known companies (Watermelons.dev are kind of new to this market).

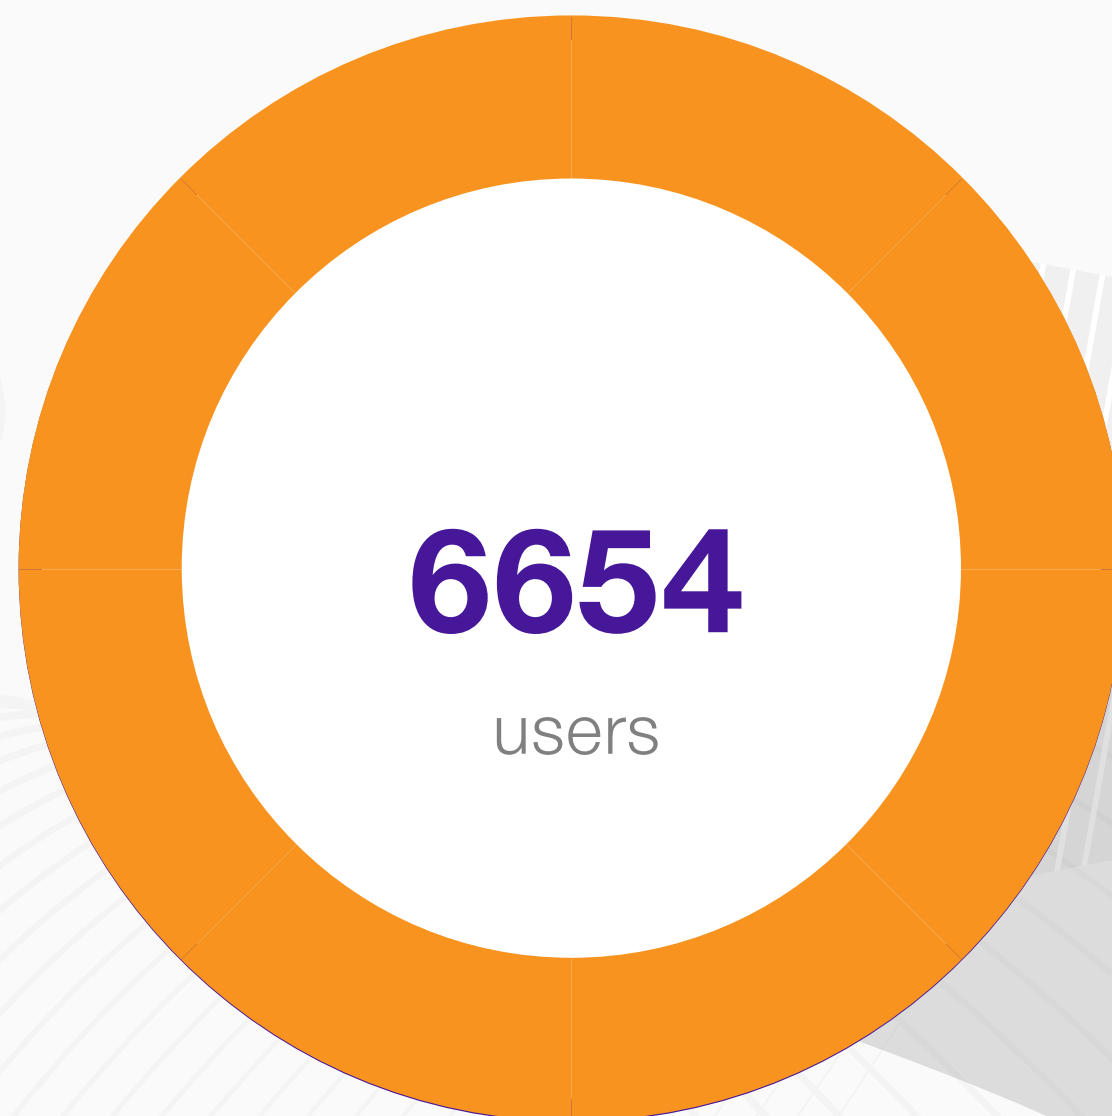

Clients Feedback.

Over the course of just 8 months, the Prok Tech team's effort resulted in the generation of over 500 high-quality leads for our business. This influx of leads has had a great impact on our sales pipeline, allowing us to connect with a wide range of potential clients and significantly expand our business opportunities.

IT PRODUCT COMPANY

Business Challenge.

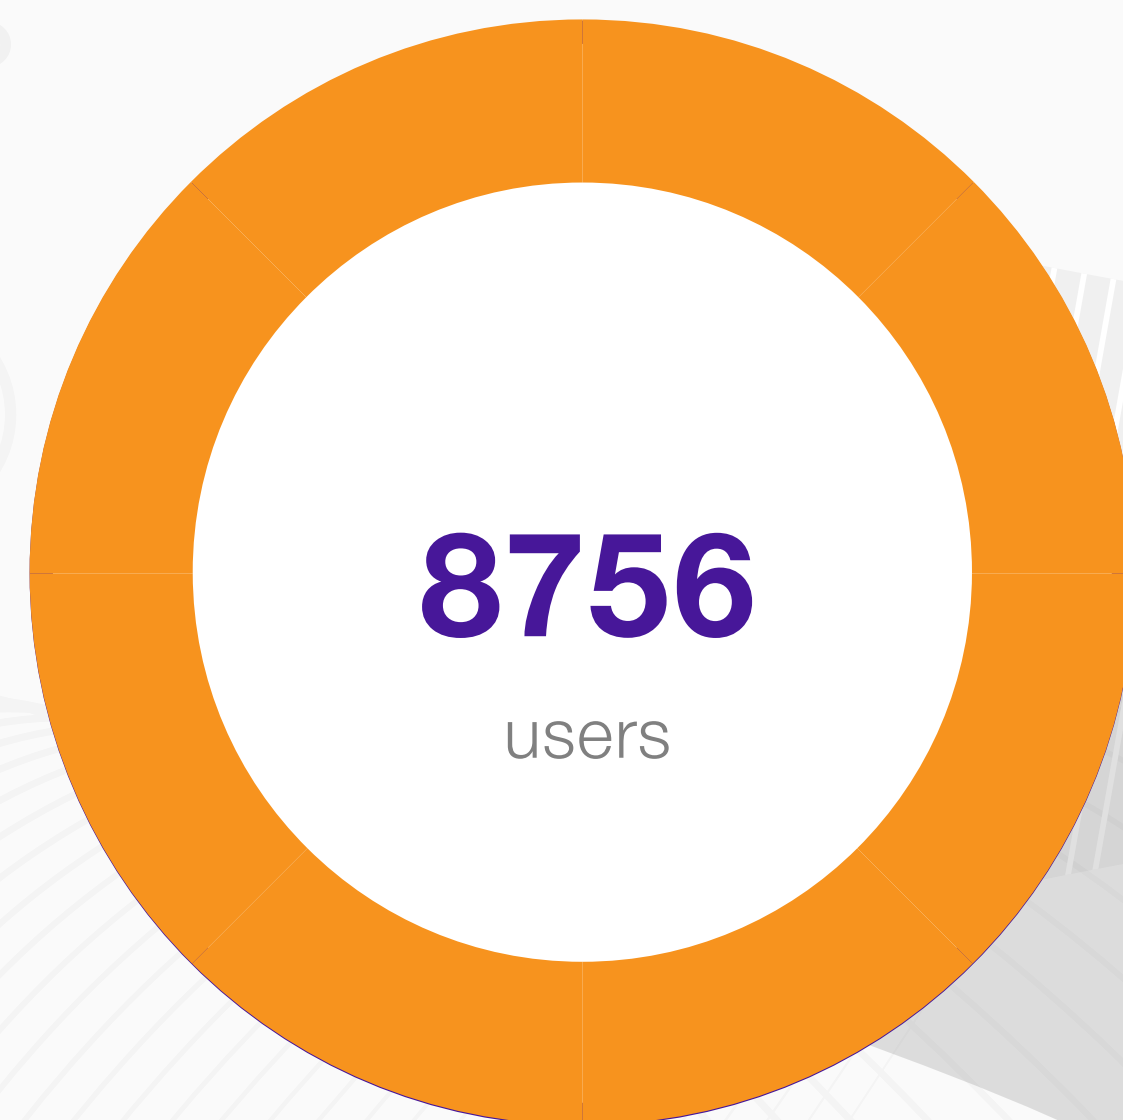

This IT industry is highly competitive, with numerous companies offering similar products and services. Regular ways of getting new clients always needed big spending on marketing. At the same time, it was still hard to target the needed audience through other sources of traffic.

Clients Feedback.

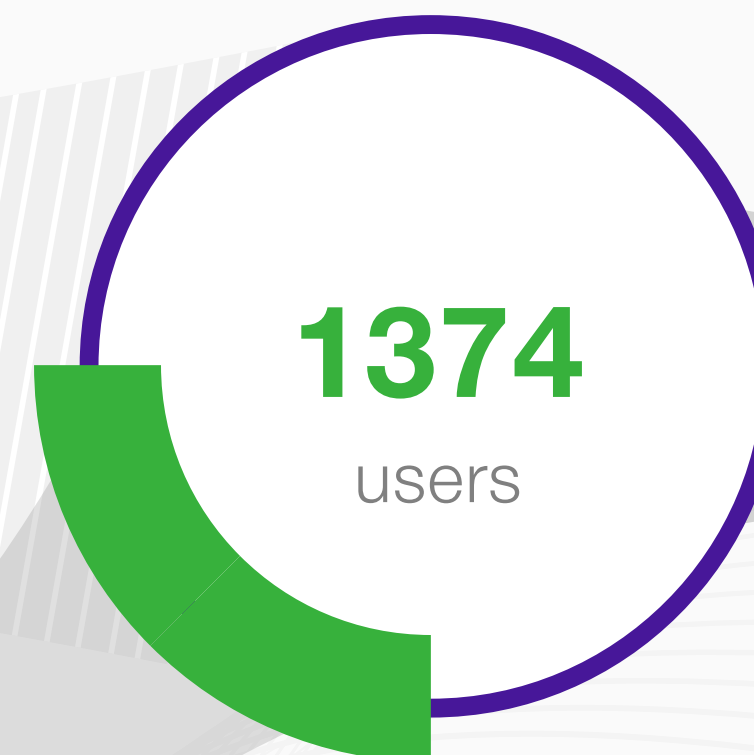

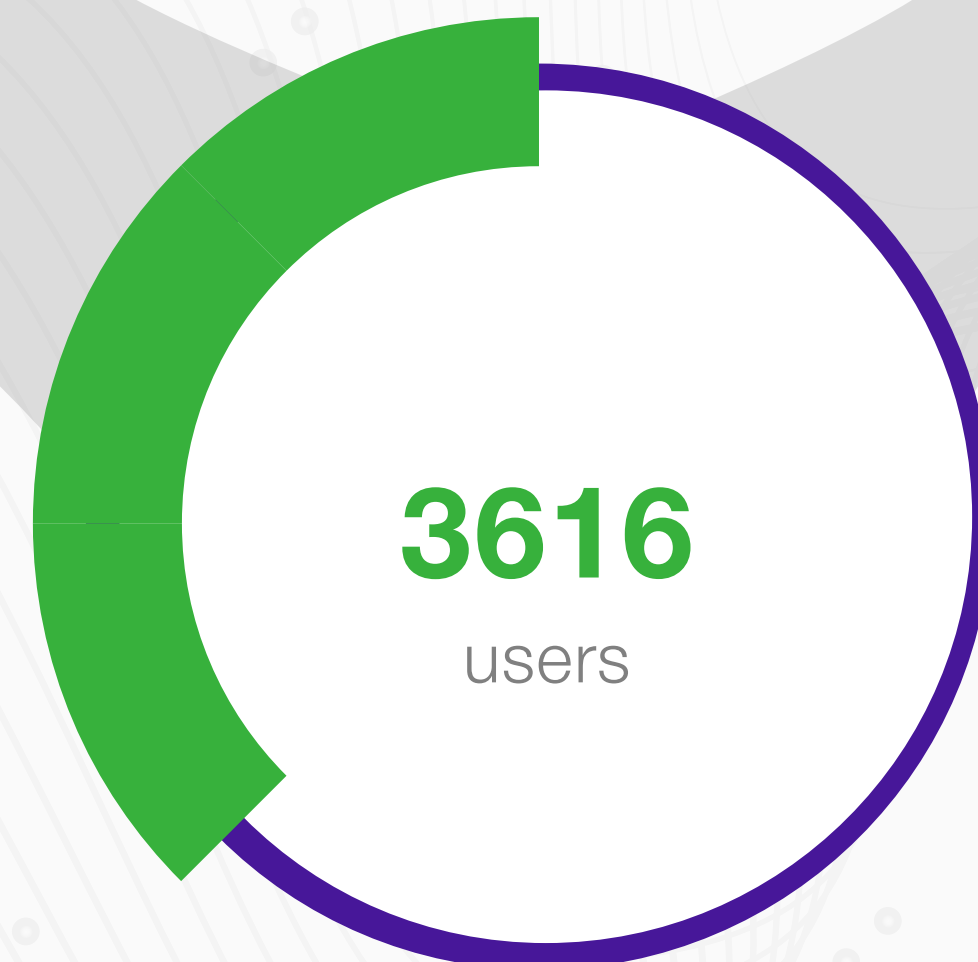

Working with your team has been a pleasure from start to finish. Your expertise in targeting the right audience and engaging with them on LinkedIn has been instrumental in driving our success. In 11 months of cooperation received a little over 1000 high-quality leads for our company. These leads have translated into nearly 200,000\$ in sales, a remarkable achievement that has surpassed our expectations.

FINDING CLIENTS AND EMPLOYEES FOR A RECRUITING AGENCY

Business Challenge.

Matching the right candidates with the specific needs of clients can be complex. Understanding the unique requirements of each job role, industry, and company culture is essential. Of course you also need to find a client before getting him the right candidate, that's also not an easy task.

Clients Feedback.

The quality of the leads and the conversion rate surpassed our expectations, demonstrating the effectiveness of your strategies and the expertise of your team. We are confident that the quality of the leads generated will continue to drive our business growth and expansion.

INVESTMENT CASE

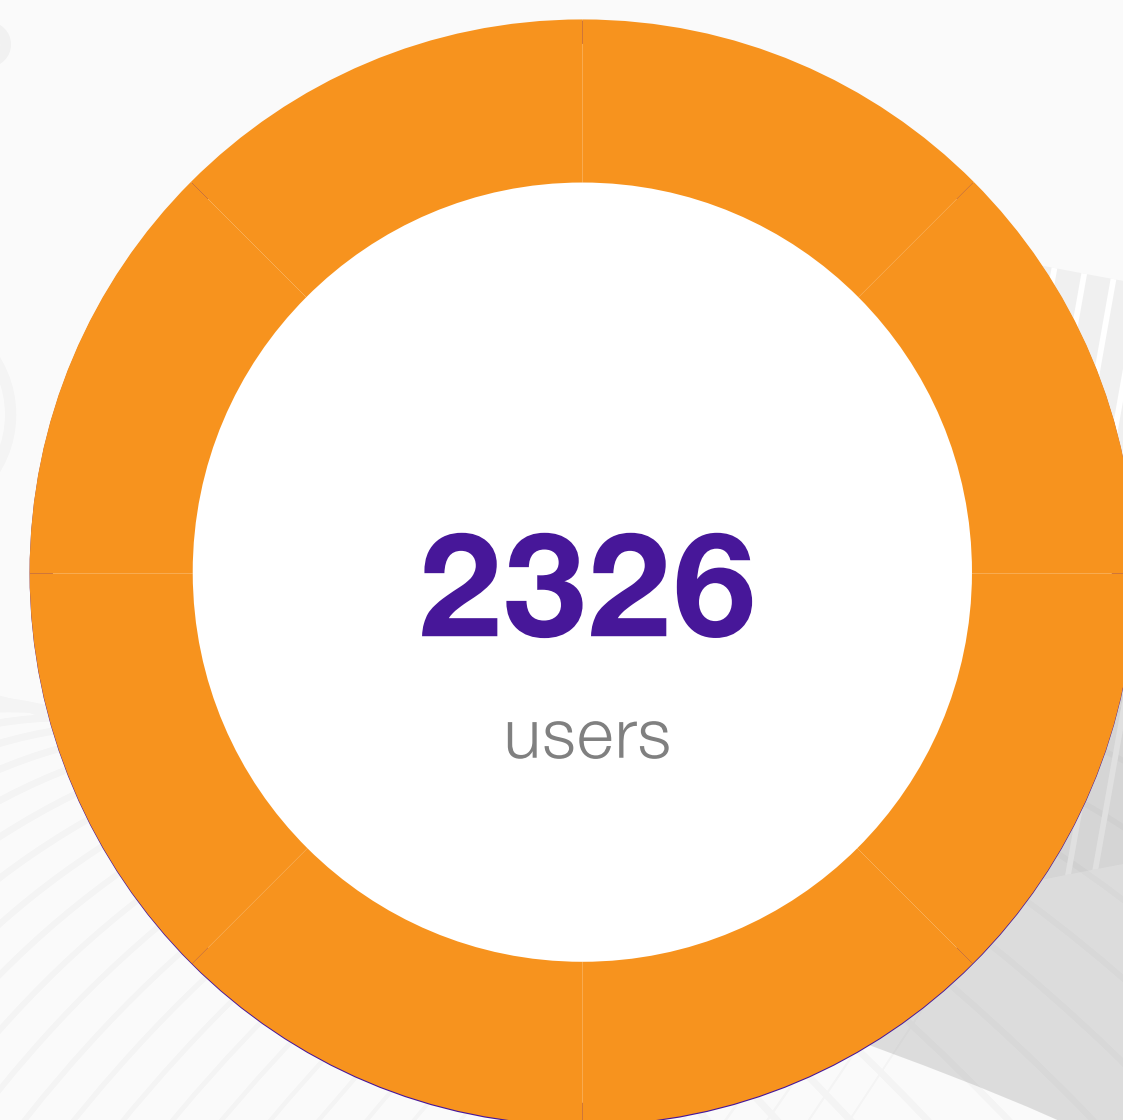

Business Challenge.

- Find prospects interested in the investments in stocks and crypto and develop the trust between the prospects and our client. Due to the crisis in the past year it was hard to find people ready to invest in such assets as crypto and stocks.

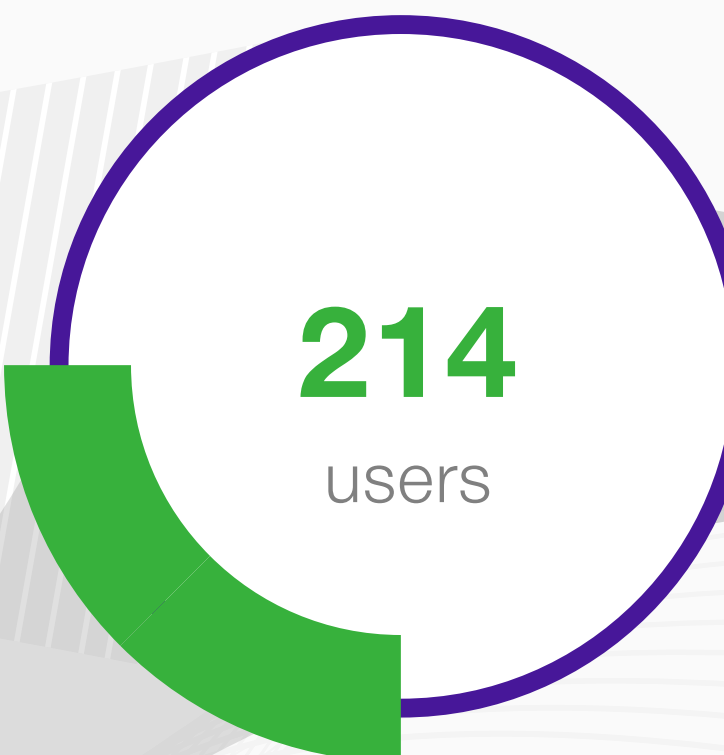

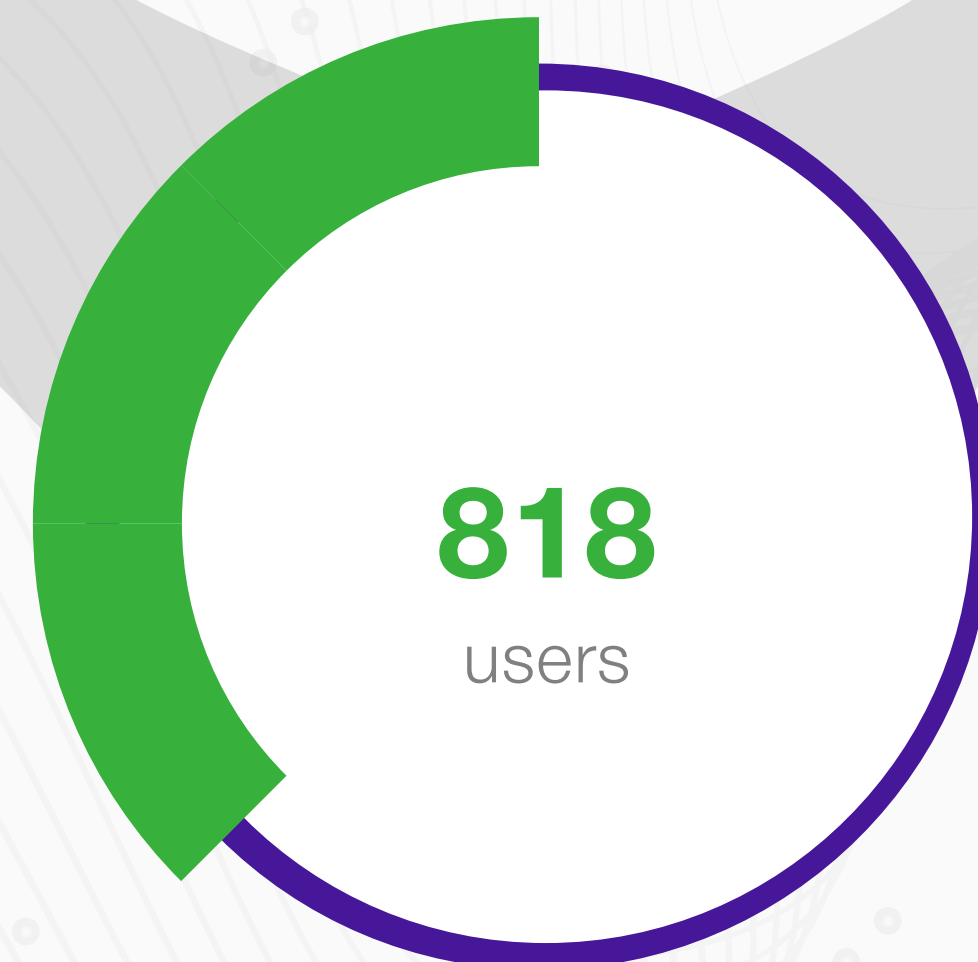

Clients Feedback.

Prok Tech helped to build a trust between the prospects and me by optimizing my LinkedIn profile and sending the right messages. As I never used a LinkedIn before I was surprised by the results of the campaign. I never thought that my target was in LinkedIn. Now I'm gonna buy that thick car I was dreaming about really soon!
